

Portfolio Management Tool

Analyze, visualize, and report results

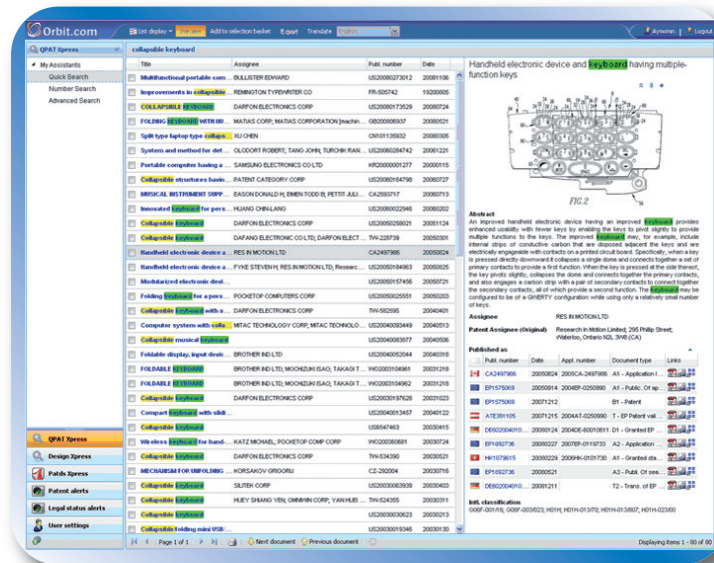

Mine patents for technical information found nowhere else

PatentExaminer is a powerful patent portfolio management system with analysis and organizing capabilities, and data encryption for secure data transmission and access. Groupware features provide corporate-wide access to collective knowledge making it the ideal tool for collaborative activity in innovative companies.

Build and organize patent portfolios through the Web

- Create and name an unlimited number of workfiles
- Feed search results and SDI alerts into workfiles
- Archive an unlimited number of records in each workfile
- Secure access by data encryption (SSL)
- Control readers' access to workfiles

Examine individual patents and leverage collective knowledge

- Sort and filter documents according to user-controlled criteria
- Display text and images side-by-side
- View drawings in mosaic format
- Highlight up to six different concepts
- Rate and annotate each document
- Share search reports and portfolio with colleagues and clients
- Client authentication by data encryption
